PROFESSIONAL EXPERIENCE

Head of IT Support / IT Lead — Retail Group (Yen's Baby Shop & Borma Fashion) *October 2017 – Present | Bandung, Indonesia*

Lead and coordinate centralized IT operations, infrastructure, and business application support across 8 active retail branches and 1 Head Office.

IT MANAGEMENT & LEADERSHIP

- Lead and coordinate a team of 1–3 IT personnel, managing daily operational activities, technical support, and IT service delivery.
- Manage IT vendors, service providers, procurement coordination, and technical requirements.
- Handle IT budget planning, expenditure monitoring, and technology procurement to support operational requirements.
- Establish IT operational procedures, technical standards, and troubleshooting workflows.
- Coordinate with management and cross-functional departments to align IT solutions with business objectives.

SYSTEM DEVELOPMENT & DIGITAL TRANSFORMATION

- Manage and support centralized ERP Backoffice and retail applications, enabling integrated transaction and inventory monitoring across multiple branches.
- Standardize SKU and inventory processes, reducing stock duplication and stock opname discrepancies by more than 90%.
- Support and develop internal business applications, including attendance management, supplier visit management, digital purchasing orders, and operational reporting.
- Develop mobile workforce applications using Flutter with GPS geolocation validation and centralized approval workflows using Laravel and MySQL.

INFRASTRUCTURE & OPERATIONAL EXCELLENCE

- Maintain POS infrastructure availability with uptime reaching 99.5% across retail operations.
- Manage network infrastructure, firewall configurations, VPN connectivity, POS devices, barcode scanners, and thermal printers.
- Supervise IT troubleshooting across hardware, operating systems, networks, and business applications.
- Maintain retail network security and connectivity through pfSense, firewall policies, and Site-to-Site VPN.
- Manage incident resolution with an average completion time below 2 hours (SLA under 2 hours).

KEY PROJECTS & ACHIEVEMENTS

1. Retail ERP & Centralized Backoffice System
Role: IT Lead / System Development

Technology: `Laravel 11, React.js, PostgreSQL (Supabase), Tailwind CSS`

- Centralized retail ERP system supporting multiple branches with integrated workflows and inventory monitoring.
- Comprehensive modules for SKU master data, purchase orders, stock transfers, and sales analytics.

2. Retail Attendance & Workforce Geolocation Mobile App
Role: System Developer

Technology: `Flutter, Dart, Laravel REST API, MySQL`

- Mobile attendance application with GPS radius validation and employee selfie verification.
- Centralized HR portal for attendance, leave, overtime, and employee administration.

3. Real-Time Branch Sales Analytics Dashboard
Role: Full Stack Developer

Technology: `React.js, Express.js, Microsoft SQL Server, Tailwind CSS`

- Developed an analytical dashboard to monitor branch sales performance and support operational reporting.
- Provides executive management with real-time data visibility for accurate business performance evaluation.

4. Digital Purchase Order & Supplier Visit Management
Role: IT Lead / Application Developer

Technology: `PHP, Laravel, MySQL, JavaScript`

- Digitized purchasing order workflows, reducing manual paperwork and accelerating approval times.
- Implemented supplier visit registration with automated purchasing department notifications.

5. Laundry Management & POS SaaS Application
Role: Independent Full Stack Developer

Technology: `PHP, Laravel, MySQL, JavaScript, Android POS`

- Web-based laundry management application with SaaS-style multi-tenant registration and subdomain provisioning.
- Integrated Android POS functionality with Bluetooth thermal printer support for receipt generation.
